**EVELYN ABALOS-TOMBOC, DBA**  
President, University of Eastern Pangasinan  
Binalonan, Pangasinan

Madam:

I am reaching out to respectfully request an assessment of our university's carbon energy usage, as part of an effort to advance University of Eastern Pangasinan commitment to environmental responsibility and sustainability.

To gain a comprehensive understanding of our carbon footprint, it would be immensely beneficial for our institution to conduct an in-depth evaluation of carbon energy consumption across campus facilities and operations. This includes energy use from electricity, heating and cooling systems, transportation, and other significant contributors. Establishing a baseline for our current carbon emissions is a crucial step toward identifying impactful sustainability initiatives.

Furthermore, I kindly request guidance and recommendations for feasible mitigation strategies based on the assessment results. We envision potential actions such as improving energy efficiency, incorporating renewable energy sources, enhancing waste reduction programs, and fostering campus-wide environmental awareness. By taking measurable steps, University of Eastern Pangasinan can reduce its carbon footprint and exemplify sustainable leadership within the academic community.

Thank you very much for considering this request, and for your continued support of our university's environmental goals. We would be happy to assist in any way necessary to ensure the success of this initiative.

Sincerely,

  
**JOHN CHRISTOPHER V. GARCES, DBA**  
*Director, University Extension Services*
